

## Which algorithms for authentication and privacy at HTTPS are supported by classic switches?

- 2018-02-09 - Classic Switches

The classic switches with release 9.0.0 support for HTTPS access following combinations:

prio	ciphersuite	protocols
------	-------------	-----------

1	AES128-SHA	TLSv1
---	------------	-------

2	RC4-SHA	TLSv1
---	---------	-------

3	RC4-MD5	TLSv1
---	---------	-------

The most secure combination is used depending on the accessing browser.
